## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-34, drawn to a p 21 peptide, classified in class 514, subclass 14.
  - II. Claims 35-47, drawn to a method of using a p21-derived peptide, classified in class 514, subclass 14.
  - III. Claims 48-54, drawn to method of using cyclin for drug screening, classified in class 530, subclass 350.

2. The inventions are distinct, each from the other because:

Groups I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product of Group I can be used in immunoassays, as molecular weight markers or as a class of controls.

Groups I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions cannot be used together wherein the use of the product of Group I would interfere with any of the results desired in the methods of Group III.

Art Unit: 1653

Groups II and III are distinct inventions wherein the two groups of methods are independent, using separate method steps, active agents, and having different effects. For example, Group II requires the use of p21-derived peptides that are not required for the method steps of Group III.

3. Claims 1, 13, 15-16, 20, 22, 25, 26, 29, 34, 36 and 48 are generic to a plurality of disclosed patentably distinct peptides and formulas comprising peptides sequences of SEQ ID NOs: 1 and 4-183, and formulas I-IV (SEQ ID NOs: 4, 2, 3 and 189, respectively). Applicant is required under 35 U.S.C. 121 to elect a single disclosed peptide sequence and the corresponding formula, even though this requirement is traversed.

Should applicant traverse on the ground that the peptide sequence and the corresponding formula are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the peptide sequence and the corresponding formula to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Claim 41 is generic to a plurality of disclosed patentably distinct cyclin proteins comprising cyclin A, cyclin E and cyclin D. Applicant is required under 35 U.S.C. 121 to elect a single disclosed cyclin protein, even though this requirement is traversed.

Should applicant traverse on the ground that the cyclin proteins are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the

Art Unit: 1653

species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for one group is not required for the other groups, restriction for examination purposes as indicated is proper.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
